Currently, I am serving as the Vice President of the American Rottweiler Club and on the Board of Directors for the Lakeland Winter Haven Kennel Club. I am a Member of the [American Rottweiler Club \(ARC\)](#), [Lakeland/Winter Haven Kennel Club \(LWK\)](#) and a past member of the [Allgemeiner Deutscher Rottweiler Klub \(ADRK - Germany\)](#). I have acted as the Show Chair for the Lakeland Winter Haven Kennel Club for several years creating a special place for people to come and try it all. I am working on gaining more breeds in the working group and further pushing myself forward with knowledge of all breeds.

I have produced over 30 show and working champions with some being Best in Show, Best in Specialty Show, High In Trial, and in the Top Ten Rottweilers in the U.S. My dogs and I travel and learn together the many sports and activities for the Rottweiler breed worldwide, including shows with the American Kennel Club (AKC), Canadian Kennel Club (CKC), German Style Shows with the RKNA, USRC, ARV, AIRK, Landesgruppe, IABCA-UCI International, FCI International, ADRK- Germany and Specialty Shows such as Medallion Rottweiler Club, Colonial Rottweiler Club, and the American Rottweiler Club.

AIRK Requirements for Entries

ZTP (Breed Survey/Zuchtauglichkeitsprüfung)

The AIRK Breed Suitability Test (ZTP) is an evaluation that verifies that the Rottweiler conforms to the FCI Standard for the Rottweiler in type and in temperament and is free of disqualifying faults. The evaluated dog must be of sound temperament, show tractability and eagerness to work. The traits of character assessed should reveal high confidence of character, sociable behavior, and the aptitude of a utility dog. The dog should be healthy in body and mind, with a self-assured nature, well-balanced nerves, and a high stimulus threshold.

Entry Requirements:

- A valid AKC, CKC, or any FCI member Kennel Club is required
- The dog must be microchipped.
- The dog must have a weight certificate dated within 30 days of the ZTP.
- Copies of the dog's Registration Certificate, Health Certificates, and Scorebook must be submitted with the dog's entry.
- The originals of the dog's Registration, Health Certificates, and Scorebook must be presented to the secretary upon check in.
- The dog must have recognized health certification for Hips, Elbows, and JLPP (OFA, ADRK, FCI).
- Accepted Hip Ratings are OFA: Excellent, Good, or Fair, ADRK: HD-, HD +/-, HD+, or FCI: HD A or B.
- Accepted Elbow Ratings: OFA: Normal, Grade I or II, ADRK: ED Free, ED+/-, ED+ or FCI: ED 0 or ED 1
- The dog must have a JLPP certificate (Clear or Carrier)
- The dog must have earned the BH

Evaluation of Conformation and Character:

- Identification: The dog's tattoo or microchip number will be verified. This is an essential part of the test, and the dog must allow itself to be touched by the judge. If the dog will not allow verification of tattoo or microchip the dog will be deemed Insufficient and the evaluation will be terminated.
- Measurement/Dentition/Eyes: Using a wicket, measuring tape and a skull measuring device, measurements of the dog's height, body length, chest circumference, and skull will be taken and recorded as well as the eye color, and dentition.
- Conformation: A complete written critique and rating of the dog as evaluated in accordance with the FCI breed standard will be recorded.
- Reaction to Gunfire: The handler and dog walk away from the judge. At a distance of fifteen paces, a 22 short blank starter pistol or its equivalent, is

fired twice with a short interval in between each shot. Should the dog have an unacceptable reaction to the gunfire, this exercise may be varied and repeated

at the judge's discretion. If the dog continues to show a strong unacceptable reaction to gunfire, the test is stopped, and the dog is deemed Unbreedable.

- Impartiality: With dog on leash the handler and dog walk through a group of five to eight people. The handler and dog return to the center of the group where the dog sits. The group, when instructed by the judge, converges on the dog and handler, and remains there until told by the judge to disperse. Minor deviations to the test routine may occur under the judge's discretion

The Protection Routine:

Rating protection work is of great significance for the breeding selection of working dogs. For this reason, the assessment of the protection work has the highest priority.

The protection routine shall mirror the ADRK ZTP routine which is the IGP 1 protection routine with two exceptions:

1. Upon instruction from the judge, the handler can walk up to the dog in the blind and take hold of the dog's collar and take the dog from the blind and then call out the helper. The handler may guide the dog by the collar from the blind position to the spot for the escape bite as well.
 2. After the out on the re-attack, the handler can take the dog by the collar and keep hold of it while heeling to the position for the long bite, and the handler can hold the dog by the collar until the dog is released for the long bite.
- Special attention will be paid to the natural inherited characteristics of the dog.
 - Dogs who leave the helper more than 5 meters will be automatically failed.
 - Dogs who release the grip due to the stick hits will be automatically failed.

Retesting Rules:

If the dog is not within the FCI standard or has a disqualifying fault, the dog may not retest.

If a dog fails the character or protection phase of the ZTP two more attempts may be made. If the dog does not pass the ZTP on the third attempt, it will be deemed unbreedable. No further attempts will be allowed.
